Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/771,047

Applicant(s)

SPARIOSU ET AL.

Examiner

PHILLIP NGUYEN

Art Unit

2828

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 October 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3, 5-8, 10, 11, 13, 16, 17, 20-24, 26-29, 31-40, 43-53 and 55-57 is/are pending in the application.
- 4a) Of the above claim(s) 10, 11, 13 and 56 is/are withdrawn from consideration.
- 5) ☒ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 2, 5-8, 10, 11, 13, 16, 17, 20, 21 and 57 is/are rejected.
- 7) ☒ Claim(s) 3, 22-24, 26-28, 31-40, 43-51, 55 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date: _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Acknowledgement

1. Claims 1-3, 5-8, 10, 11, 13, 16, 17, 20-24, 26-29, 31-40, 43-53 and 55-57 are pending.
Claims 54 and 58 are cancelled.
Claims 2, 35, 52 are amended.
Claims 10, 11, 13 and 56 are withdrawn from consideration.

Response to Arguments

2. Applicant's arguments with respect to claims 1-2, 5-8, 16-17, and 20-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

3. Claims 55 and 56 are objected to because of the following informalities:
The claims are to depend on claim 54 which has been cancelled. It is believed that claims are supposed to be dependent on claim 52.
Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2, 5-7, 16, 20, and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rediker (US 4479224) in view of Miers (US 5872627).

FIG. 1

FIG. 2

With respect to claims 1 and 20, Rediker discloses in Fig. 1-2 a laser system comprising a plurality of laser fibers 28; a high power pump source 14, 16, 18, 20 coupled to each of said laser fibers; and an external cavity (defined by fiber end and reflector 32) having an optical axis, said external cavity having a first lens 42, a single aperture 46, a second lens 44, and a mirror 362 located at focal points of the first and second lenses.

However, Rediker does not disclose beam-flattening optics.

Miers discloses in Fig. 1 (shown below) an optical apparatus having a spatial filter and a beam-flattening optics 158.

FIG. 1

It would have been obvious to one skill in the art at the time the invention was made to provide the beam-flattening optics as taught by Miers to Rediker in order to reduce loss of laser beam due to the beam divergence from the laser diode 131. Also see col. 24, lines 19-40.

It is noted that in the instant application, applicant asserts that beam flattening optics are well known in the art, and one skilled in the art with access to the present teachings may construct the array of beam-flattening optics 20 without undue experimentation (page 13, lines 1-5). Therefore, it is strongly believed that adding beam flattening optics as claimed is neither novel nor inventive.

With respect to claim 2, Rediker discloses the laser system outputs an eye-safe laser beam of 1.5 microns (col. 4, lines 31-42).

With respect to claim 5, Rediker discloses each of said high power laser pump sources include a laser diode (col. 3, lines 11-13).

With respect to claim 6, Rediker discloses the claimed invention except for discrete imaging optics. In Fig. 4 of the present application, focusing lens 70 is designated as discrete imaging optics. Hamilton further discloses discrete imaging optics 1319 being end-coupled via the laser pump source 1301. It would have been obvious to the one having ordinary skill in the art at the time the invention was made to provide a discrete imaging optics as taught by Hamilton to Rediker in order to reduce the divergence (paragraph 0071).

With respect to claim 7, Rediker discloses the pump sources 14, 16, 18, and 20 are coupled via a reflective cavity.

With respect to claim 16, since Rediker discloses the fiber bundle being used as "cavity end", the ends are considered as integrated reflectors.

With respect to claim 57, since Rediker discloses the product shown in the rejection of claim 1, it is inherent product by process to perform the recited method.

5. Claims 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rediker (US 4479224) in view of Miers (US 5872627) and further in view Waarts et al. (US 6298187). Rediker and Miers disclose the claimed invention except for the laser fibers with differing lengths differ in length from one another by more than 1.5 centimeters. Waarts discloses fibers with different lengths by at least 1.5 cm. It would have been obvious to one skill in the art at the time the invention was made to provide fibers with different lengths by at least 1.5 cm as taught by Waarts to provide different wavelengths.

6. Claims 16-17 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rediker (US 4479224) in view of Miers (US 5872627) and further in view of Jiang et al. (US 6982997).

With respect to claims 16-17, Rediker and Miers disclose the claimed invention except for a Bragg reflectors integrated in the laser fiber. Jiang discloses in Fig. 1 Bragg reflectors 14 integrated in the laser fiber 18. It would have been obvious to one skill in the art at the time the invention was made to provide the Bragg reflectors 14 as taught by Jiang in order to provide a feedback necessary to sustain the laser operation in the external cavity (col. 3, ln. 27-31).

With respect to claim 21, Rediker discloses said plural pump sources include diodes (14, 16, 18, and 20).

Allowable Subject Matter

7. Claims 3, 22-24, 26-28, 31-40, 43-51 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 29, 31-40, 43-45, 46-53 are allowed.

The reasons for allowance were indicated in the previous Office Action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Communication Information

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Nguyen whose telephone number is 571-272-1947. The examiner can normally be reached on 9:00 AM - 6:00 PM, Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MINSUN HARVEY, can be reached on 571-272-1835. The fax phone number for the organization where this application or proceeding is assigned is **571-273-8300**.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
